WEB DESIGN

Build Real Projects | Gain Practical Skills | Start Your Career

Duration: 2 Months | **Mode: Online / Classroom Hybrid** | **Software Development**

P **PRACTICAL TRAINING**
Over 120+ Hours of Live Instructor-Led Interactive Training

E **EXPERT MENTORSHIP**
Direct 1-on-1 Mentorship from Senior Software Architects

C **CAREER OUTCOMES**
Industry-Standard Microservices & Cloud-Native Architecture

1 **Hands-on Learning**

2 **Real World Projects**

3 **Expert Guidance**

4 **Career Support**

Turn Your Ideas Into Real Websites and Applications

About Program

An intensive, end-to-end career transformation program designed to train students and professionals in modern software engineering, scalable architectures, and production best practices. Web Designing Course

LEARNING FORMAT	DURATION & PACE	DELIVERY MODE	CREDENTIALS
Mentor-led Live	**2 Months**	**Online / Classroom Hybrid**	**Industry Certified**
Interactive Sessions	Daily Practice Drills	Hands-on Code Labs	Marvel Slice Verified

PILLAR 01

Modern UI Architecture

Master scalable component design systems, state orchestration, routing, and accessible W3C compliance.

PILLAR 02

Applied Engineering Labs

Solve real-world challenges through daily guided drills, code refactoring, and Core Web Vitals optimization.

PILLAR 03

Career & Placement Velocity

Build deployed showcase applications with 1:1 resume optimization, system mock interviews, and referrals.

What You Will Achieve

- Architect scalable, maintainable web applications using modern semantic markup and CSS layouts
- Build responsive, mobile-first user interfaces with fluid grids and interactive micro-animations
- Master component-driven development with React, state management, and declarative hooks
- Integrate RESTful APIs and asynchronous data workflows with error handling and caching
- Optimize client-side performance, accessibility (WCAG), and Core Web Vitals for production
- Deploy and maintain live applications on cloud platforms with continuous deployment pipelines
- Collaborate using professional Git workflows, pull requests, and peer code review standards
- Ship multiple portfolio-ready projects with clean, documented code and public demonstrations

Key Highlights

- 620+ Hrs of Applied Practical Learning
- 218+ Hrs of Self-Paced Video Modules
- 48+ Industry Projects & Real Case Studies
- 100% Dedicated Placement Assistance Support
- 24*7 Mentor Doubt Clearing Support
- 1:1 Technical & HR Mock Interviews
- 2 Days Campus Immersion & Hackathons
- Certification in Modern Frontend Architecture
- Up to Rs. 50 Lakhs Startup Incubation Support*
- Flexible Weekday & Weekend Batches
- 90+ Live Instructor-Led Faculty Sessions
- Learn from Senior Industry Practitioners
- Regular One-on-One Technical Mentorship
- Resume Preparation & LinkedIn Optimization
- Designed for Working Pros & Freshers
- No-Cost EMI Payment Options Available
- Top Batch Performers Fellowship Awards*
- 3 Guaranteed Placement Interviews
- Lifelong Engineering Alumni Network
- Continuous Cloud Sandboxes & LMS Access

Program Pedagogy

Instructor-led Training
Get trained by top industry experts

Self-paced videos
Learn at your own pace with world-class content

Hackathons
Get a sense of how real projects are built

Gamified Learning
Get involved in group activities to solve real-world problems

Dedicated Learning Management Team
To help you with your learning needs

Projects and Exercises
Get real-world experience through projects

Peer Networking and Group Learning
Improve your professional network and learn from peers

1:1 Personalized Learning
Hands-on exercises, project work, quizzes, and project builds

Who Can Apply?

Open to passionate learners and professionals across diverse academic, analytical, and technical backgrounds.

Freshers & College Graduates
Aspiring engineers seeking practical production skills to secure their first high-growth software role.

Working Professionals Switching Roles
Professionals in non-tech, QA or legacy roles transitioning into modern full-stack engineering careers.

Junior Developers & Upskillers
Developers wanting to master modern frameworks, system architecture, and enterprise best practices.

Career Restarters & Returners
Individuals returning to tech after a sabbatical, refreshing with 1:1 mentor support and live builds.

Freelancers & Indie Builders
Builders looking to deliver end-to-end client applications with production-grade speed and reliability.

Passionate Self-Learners
Anyone determined to complete 10 intensive modules with daily mentor-verified coding practice.

ELIGIBILITY & TECHNICAL PREREQUISITES

Academic Eligibility
Any degree / diploma (BE, BTech, BSc, BCA, BCom, or equivalent stream).

Prior Coding Background
No prior coding needed — starts from zero

System & Hardware Setup
Laptop/PC with 8GB RAM, modern web browser, and broadband internet.

Application & Onboarding Journey

01 **SUBMIT APPLICATION & PROFILE REVIEW**
Submit your academic details and career aspirations through our admissions form for instant evaluation.

02 **1:1 CAREER COUNSELLING & ROADMAP**
Connect with an engineering career advisor to review syllabus fit, batch timings, and learning milestones.

03 **ENROLLMENT & LMS ONBOARDING**
Confirm your batch seat, receive your Marvel Slice student portal login credentials, and join the cohort community.

04 **ORIENTATION & MENTOR MATCH**
Attend the live orientation session, configure your developer tooling, and start Module 1 with dedicated mentor support.

Marvel Slice
INSTITUTE FOR SOFTWARE LEARNING

Your Journey

From Registration to a Successful Career

A clear step-by-step journey to help you learn, build and get placed

01

Registration
Enroll in the course and start your learning journey with us.

02

Access Learning
Get instant access to structured video classes, study materials and resources.

03

Learn Fundamentals
Understand core concepts with guided lessons and hands-on exercises step by step.

04

Hands-on Practice
Work on real-world projects to build practical skills.

05

Certification
Complete the course and receive a verified certificate.

06

Portfolio Development
Build a strong portfolio with multiple projects to showcase your skills.

07

Expert Guidance
Get mentor support, code reviews and personalized feedback.

08

Interview Preparation
Get resume building support, mock interviews and soft skills training.

09

Apply to Opportunities
Get access to job openings and referral opportunities through our network.

10

Placed in a Job
Start your career in your dream role and grow to new heights!

Program Curriculum

Comprehensive Practical Syllabus • Part 1 of 5

MODULE 1

Introduction to Web Designing

Apply human-centered design principles, interactive wireframing, high-fidelity prototypes, and cohesive design systems.

- What is a website?
- What is a webpage?
- Internet and web browsers
- How websites work
- Introduction to HTML, CSS and JavaScript
- Setting up a coding environment

TOOLS & ENVIRONMENT

JavaScript | HTML5 | CSS3

KEY COMPETENCY GAINED

Produce interactive high-fidelity design prototypes ready for developer handoff.

TECHNICAL DRILL & PRACTICAL LAB

Practice wireframing, interactive vector layout creation, and component auto-layout constraints in Figma.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

MODULE 2

HTML Fundamentals

Master semantic document structures, accessible markup standards, multimedia integration, and SEO-compliant web fundamentals.

- HTML document structure
- HTML tags and elements
- Headings and paragraphs
- Text formatting
- Comments
- Lists
- Links

TOOLS & ENVIRONMENT

HTML5 | JavaScript | CSS3

KEY COMPETENCY GAINED

Build clean, accessible semantic page structures compliant with modern W3C standards.

TECHNICAL DRILL & PRACTICAL LAB

Complete practical drills on semantic structuring, form accessibility checks, and live W3C validation.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

Program Curriculum

Comprehensive Practical Syllabus • Part 2 of 5

MODULE 3

HTML Forms

Master semantic document structures, accessible markup standards, multimedia integration, and SEO-compliant web fundamentals.

- Forms
- Text boxes
- Email and password fields
- Radio buttons
- Checkboxes
- Dropdown lists
- Submit buttons

TOOLS & ENVIRONMENT

HTML5 | JavaScript | CSS3

KEY COMPETENCY GAINED

Build clean, accessible semantic page structures compliant with modern W3C standards.

TECHNICAL DRILL & PRACTICAL LAB

Complete practical drills on semantic structuring, form accessibility checks, and live W3C validation.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

MODULE 4

CSS Fundamentals

Build modern responsive layouts, fluid grid systems, custom typography, animations, and cross-browser styling architectures.

- What is CSS?
- Inline CSS
- Internal CSS
- External CSS
- Colors
- Backgrounds
- Fonts

TOOLS & ENVIRONMENT

CSS3 | JavaScript | HTML5

KEY COMPETENCY GAINED

Design fluid responsive layouts with micro-interactions and cross-device consistency.

TECHNICAL DRILL & PRACTICAL LAB

Execute responsive layout exercises utilizing modern Flexbox, CSS Grid layouts, and custom media query breakpoints.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

Program Curriculum

Comprehensive Practical Syllabus • Part 3 of 5

MODULE 5

CSS Layout

Build modern responsive layouts, fluid grid systems, custom typography, animations, and cross-browser styling architectures.

- Width and height
- Margin and padding
- CSS Box Model
- Classes and IDs
- Flexbox
- Creating cards
- Creating navigation bars

TOOLS & ENVIRONMENT

JavaScript | CSS3

KEY COMPETENCY GAINED

Design fluid responsive layouts with micro-interactions and cross-device consistency.

TECHNICAL DRILL & PRACTICAL LAB

Execute responsive layout exercises utilizing modern Flexbox, CSS Grid layouts, and custom media query breakpoints.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

MODULE 6

JavaScript Fundamentals

Deepen logical programming foundations, DOM manipulations, event-driven interfaces, and asynchronous data handling.

- Introduction to JavaScript
- JavaScript in HTML
- Variables
- let and const
- Strings
- Numbers
- Boolean values

TOOLS & ENVIRONMENT

JavaScript | HTML5

KEY COMPETENCY GAINED

Master dynamic DOM scripting, client-side event loops, and asynchronous data flows.

TECHNICAL DRILL & PRACTICAL LAB

Solve algorithm drills, dynamic DOM event handling exercises, and asynchronous API data fetching challenges.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

Program Curriculum

Comprehensive Practical Syllabus • Part 4 of 5

MODULE 7

JavaScript Conditions & Functions

Deepen logical programming foundations, DOM manipulations, event-driven interfaces, and asynchronous data handling.

- if
- else
- else if
- Functions
- Parameters
- Return values
- Simple calculations

TOOLS & ENVIRONMENT

JavaScript | HTML5 | CSS3

KEY COMPETENCY GAINED

Master dynamic DOM scripting, client-side event loops, and asynchronous data flows.

TECHNICAL DRILL & PRACTICAL LAB

Solve algorithm drills, dynamic DOM event handling exercises, and asynchronous API data fetching challenges.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

MODULE 8

Interactive Websites

Gain in-depth practical expertise in interactive websites through guided technical walkthroughs, exercises, and real-world implementation.

- JavaScript events
- Button click events
- User input
- Form interaction
- DOM introduction
- Changing HTML content
- Changing CSS using JavaScript

TOOLS & ENVIRONMENT

JavaScript | HTML5 | CSS3

KEY COMPETENCY GAINED

Independently architect and execute production-ready interactive websites implementations.

TECHNICAL DRILL & PRACTICAL LAB

Work through step-by-step practical coding exercises and technical walkthroughs applying interactive websites with mentor guidance.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

Program Curriculum

Comprehensive Practical Syllabus • Part 5 of 5

MODULE 9

Responsive Web Design

Apply human-centered design principles, interactive wireframing, high-fidelity prototypes, and cohesive design systems.

- Mobile vs desktop websites
- Responsive design
- Viewport
- Media queries
- Responsive images
- Mobile-friendly layouts

TOOLS & ENVIRONMENT

Figma | FigJam | Auto Layout | Prototyping

KEY COMPETENCY GAINED

Produce interactive high-fidelity design prototypes ready for developer handoff.

TECHNICAL DRILL & PRACTICAL LAB

Practice wireframing, interactive vector layout creation, and component auto-layout constraints in Figma.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

MODULE 10

Website Design & Debugging

Apply human-centered design principles, interactive wireframing, high-fidelity prototypes, and cohesive design systems.

- Website navigation
- Header and footer
- Hero sections
- Cards
- Buttons
- Basic UI/UX
- Finding HTML errors

TOOLS & ENVIRONMENT

JavaScript | HTML5 | CSS3

KEY COMPETENCY GAINED

Produce interactive high-fidelity design prototypes ready for developer handoff.

TECHNICAL DRILL & PRACTICAL LAB

Practice wireframing, interactive vector layout creation, and component auto-layout constraints in Figma.

PRACTICE FOCUS: Hands-on coding exercises, syntax drills & mentor validation.

Technologies & Tools You Will Master

- JavaScript
- HTML5
- CSS3

Course Projects

Industry-grade portfolio applications built step-by-step from beginner to advanced.

BEGINNER 01

Project 1: My Profile Website

Real-world practical application building My Profile Website using core concepts and hands-on skills covered in this syllabus.

STACK: JavaScript - HTML5 - CSS3

INTERMEDIATE 02

Project 2: Portfolio Website

Real-world practical application building Portfolio Website using core concepts and hands-on skills covered in this syllabus.

STACK: JavaScript - HTML5 - CSS3

ADVANCED 03

Project 3: Interactive Quiz Game

Real-world practical application building Interactive Quiz Game using core concepts and hands-on skills covered in this syllabus.

STACK: JavaScript - HTML5 - CSS3

ADVANCED 04

Project 4: Responsive Personal Website

Real-world practical application building Responsive Personal Website using core concepts and hands-on skills covered in this syllabus.

STACK: JavaScript - HTML5 - CSS3

Career Roles & Opportunities

- Frontend Developer
- React / UI Developer
- Web Designer (UI)
- Full Stack Developer

Career Services & Placement Assistance

Career Roadmaps & Strategy
1:1 technical career planning aligned to your profile.

Technical Mock Interviews
Practice with FAANG & enterprise interview drills.

Resume & LinkedIn Makeover
ATS-compliant resume & recruiter-ready profile.

Direct Hiring Referrals
Priority shortlisting across 150+ verified hiring partners.

1:1 Mentor Guidance
Personal doubt-clearing & transition counseling.

Hackathons & Hiring Days
Live collaborative team builds to demonstrate skills.
